✘ **Caves in the Bükk by Ferenc Bakó**

In folk architecture stone is not used in the traditional way, but following the model of natural caves, it was used to carve cavity in the rock. The condition of such cave development obviously was the presence of a suitable material. The most of the caves of the Carpathian Basin are carved out of volcanic tuff, but some of the loess lands and the sandstone also gave opportunity for people to carve cavities to dwell there.

✘ **Borsod County Ethnographic Literature by Ferenc Bodgál**

Bibliography is essential for local history research. Data provide information on the quantity of work performed and the subject matter. For his work Ferenc Bodgál used the manuscript material of the Ethnographic Museum and the Herman Ottó Museum and he used the bibliography of István Sándor, too. He finished his research work on 1st October, 1958.

✘ **Spinning room in Borsod by Árpád Lajos**

This book, as a scientific work, is the author's first attempt to depict the tradition of spinning and weaving of the bygone peasant life. Spinning is highlighted both as an old way of production and as folk tradition and is demonstrated in the nation's most varied county, in Borsod. This book is the systematic result of long arduous years of research work, giving a comparative analysis of the various ethnographic groups and landscapes of the county.

✘ **The linguistic analysis of Borsod and Bodrog counties' settlements in the Árpád Age by Rita Póczos.**

Bodrog and Borsod counties of the Árpád Age were regions located far from each other having different conditions in terms of geographical, social geographical and linguistic perspective. In her essay, Rita Póczos, in particular examines whether these differences are reflected in the available data from which the names of settlements can be reconstructed, and if so, to what extent.

✘ **Temples of the Árpád Age in Borsod county by Ferenc Szabó**

More precious relics of the Árpád Age are revealed every day. Some sort of feverish activity follows the exploration. The research initiated by the Committee of National Monuments, including the results of the excavations in Esztergom led by Tibor Gerevich, has convinced everyone of the extraordinary importance of these works. Ferenc Szabó has contributed to the research work with his studies on the Árpáadian churches in Borsod county.
